OptoSight®
Your Digital Assistant to Maximize Your Productivity

OptoSight® streamlines production lab management to optimize machine efficiency. It provides real-time production monitoring to reduce downtime and to maximize your productivity by analyzing machine data and performance metrics.

Reduce Total Cost of Ownership

Allows you to identify and resolve problems in real-time, and thereby improving traceability of errors and reducing production downtime
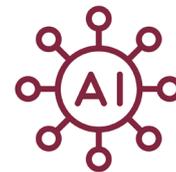

Production Machinery Overview

Provides a compact overview of all linked OptoTech machines within a production hall, allowing users to quickly grasp the current state of operation

Ease of Service

Supports remote troubleshooting and provides access to all machine-related documentation for effective problem solving and seamless interaction between OptoTech service and customers from any location

AI Assistant

Simplifies equipment operation, offering immediate access to comprehensive information and streamlined workflows
